

# Sir Simon Milton Westminster UTC

Vision – Mission - Purpose

# Vision

We are here to nurture, support and develop the next generation of STEM (Science, Technology, Engineering & Mathematics) leaders who can help make the world we live in a better place.

*The inspiration for the Sir Simon Milton Westminster UTC is the lasting legacy of Sir Simon, whose vision of London's future encompassed accessible education and employment for all young people, fostering their talents and promoting social cohesion. The ethos of the college will be grounded in its commitment to diversity and inclusivity in its community.*

# Mission

We are passionate about STEM and know that this is academic as well as practical. Engineering is a broad spectrum. Students may go on to Civil Engineering, Mechanical Engineering, Electronic Engineering, Aerospace Engineering, Biomedical Engineering, Chemical Engineering... the list goes on. **The only way for students to truly understand and choose the path for them, is to experience them first hand. And that is what we provide here.**

*Why? ... Because Engineers are in short supply and high demand. 7 of the top 9 highest paid jobs in the UK relate to Technology and Engineering. There are simply not enough people with the right skills.*

# Purpose

To be an outstanding school for students passionate about Science, Technology, Engineering & Maths through an approach that is **highly academic, hands on** and **business focused**.

To expose students to a wide range of opportunities in Engineering & Technology, preparing them for **University, Apprenticeships** and **Jobs**.

To utilise our exceptional **facilities, employer partnerships** and **university links** to stand above other education providers and deliver unmatched development opportunities.

To be a centre of excellence, where youngsters passionate about STEM from across London aspire to attend.

To be an exemplary employer, developing staff and creating a stimulating & inclusive working environment.
